

Paradigm®

GARDEN OASIS SUB 8

INGROUND SUBWOOFER

Purpose Built for the Outdoors

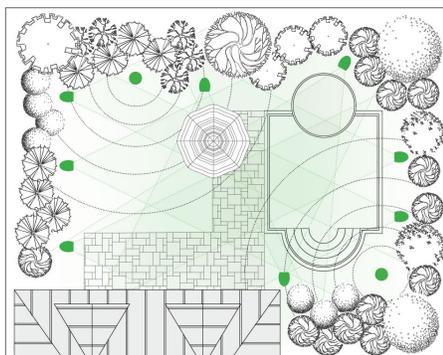

The Garden Oasis Sub 8 Inground Subwoofer uses high-output, high-excursion, water resistant drivers inside a HDPE enclosure (the same material used for underground water systems), offering excellent rigidity and water resistance. The Garden Oasis Sub 8 was designed to be discrete with only the “mushroom cap” hood visible. This hood evenly distributes the bass, keeps the driver protected from the elements, and provides constant fresh airflow for years of worry-free operation.

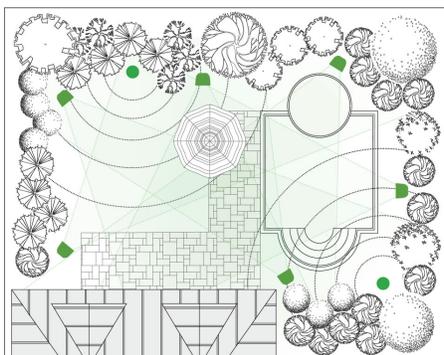

Reinforce the Bass In Your Outdoor Space

The Garden Oasis Sub 8 is a direct-burial, 8” subwoofer designed to compliment Paradigm’s assortment of performance outdoor audio solutions. With 200-watts (RMS) of power handling, it brings ground-shaking bass response to your already existing outdoor speaker system. The Garden Oasis Sub 8 is the perfect companion to Paradigm’s traditional Stylus and ROCK-Monitor outdoor audio solutions, or use it to further reinforce the bass in your Paradigm Garden Oasis Essentials Music System.

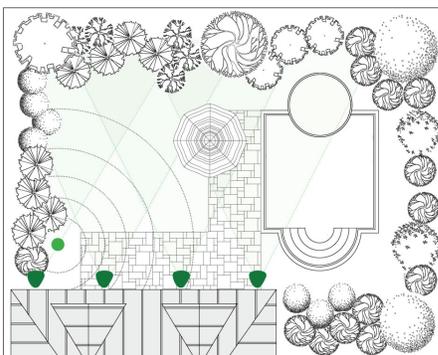

This compact and rugged passive subwoofer will put the finishing touches on any great outdoor entertainment space. So bring Paradigm to the party and experience our legendary sound, all from the comfort of your outdoor space.
