

OUTDOOR LIVING SERIES

Landscaping and outdoor living spaces are about more than just adding beauty to your home. They create a distinctive space that brings people together in an inviting, comfortable environment. They are a place to share exceptional food and drinks with your family and closest friends. As much as carefully chosen adornments enhance the visual appeal and enjoyment of the scenery, compelling music from high-performance speakers enhances the ambiance. **MartinLogan's Outdoor Living system brings unmatched audio quality to the music in your outdoor living space.**

*"In summary, the MartinLogan Outdoor Living System provides a flexible system that can be scaled to fit a wide variety of outdoor spaces while providing high-quality sound. Being lucky enough to live in Southern California where outdoor living is available the majority of the year, I am a big proponent of increasing the quality of your outdoor sound system—and the MartinLogan Outdoor Living System does just that." – **Brian Kahn***

*"I was in no way expecting that an outdoor system could make me forget my high-fidelity indoor audio system. That was until I installed the MartinLogan Outdoor Living Series system in my own backyard. This system uses multiple satellites and an excellent subwoofer to evenly fill your space with full-range audio that can stand up to the sound quality you get from even very fine indoor systems. This is not hyperbole on my part. I wish all our readers could experience the MartinLogan Outdoor Living sound first hand for themselves." – **Jim Clements***
